Profile

Holder of a diploma in Applied Mathematical and Physical Sciences and an M.Sc in Data Science and Machine Learning. Proficient in Python, SQL, R, Tableau and Excel. Committed to continuous learning and skill enhancement, particularly in Python. Eager to make a meaningful impact in data-driven roles.

Education

- Data Science and Machine Learning** 2025
Hellenic Open University, Patras (online)
Master's degree in Data science techniques and Machine Learning models using Python and R programming languages. (GPA 9.8/10)
- Applied Mathematical and Physical Sciences** 2009
National Technical University of Athens (NTUA), Athens
Diploma (Integrated Master's degree - 5-year program) in Applied Mathematics and Physics. Specialization in Materials science and Optoelectronics.

Work History

- Junior Developer** Nov 2025 - Feb 2026
e-gate.gr, Marousi
 - Developed Python-based web scraping solutions to collect and structure product data from multiple external websites.
 - Built automated workflows for processing, cleaning, and inserting supplier product data into internal postgres databases.
 - Contributed to backend development of an internal tool using FastAPI, supporting data management and operational processes.
 - Created and tested database procedures using python's SQLAlchemy and managed version control through GitLab in a remote server environment (SSH).
 - Performed data exploration and transformation using Pandas, converting JSON files into structured datasets and Excel reports.

Key Skills Developed: Python development, web scraping, backend development, database management, SQLAlchemy, data cleaning & transformation, automation workflows, Git version control, remote server collaboration, problem-solving.

- Back Office & Documentation Specialist** May 2010 - Oct 2023
Athens Mindfit Training Center, Athens
 - Managed large volumes of technical and regulatory documentation, collecting, structuring and validating data to ensure compliance with Greek law, and alignment with EU-funded program requirements.
 - Maintained internal databases and records, tracking financial transactions (invoices, payments) and operational activities with attention to detail.
 - Supported day-to-day IT operations by troubleshooting hardware and software issues, contributing to smooth data and system workflows.
 - Collaborated directly with clients, demonstrating strong problem-solving, communication, and customer-facing skills.

Key Skills Developed: Data organization & validation, regulatory compliance, documentation management, financial record-keeping, reporting, problem-solving, time management, client communication.

Problem Solving

Statistical Analysis

Web scraping

Awards

Recipient of Academic Excellence Scholarship during Master's Degree in Data Science and Machine Learning

Hobbies

- Escape rooms
- Board games
- Ping pong

Personal Data Science / ML Projects

1) Time Series Forecasting for natural gas consumption Sep 2025
[Python / Tensorflow / Matplotlib](#)
Forecasted Greece's natural gas demand (Aug 2024–Jul 2025) using historical consumption and temperature data, comparing multiple **forecasting models** to capture seasonal and weather-driven trends.
(<https://fotopoulos.eu.pythonanywhere.com/project4.html>)

2) Generating images with Deep Learning Models Jul 2025
[Python / Tensorflow](#)
Designed, trained and evaluated **four deep learning models** on the Fashion MNIST dataset for image generation, aiming to produce outputs visually similar to the original dataset samples.
(<https://fotopoulos.eu.pythonanywhere.com/project3.html>)

3) Comparing classifiers using R Jul 2024
[R / RStudio](#)
Comparing seven renowned **classification algorithms** on the Titanic dataset, using the R programming language and RStudio software.
(<https://fotopoulos.eu.pythonanywhere.com/project2.html>)

4) Web Scraping with Python Oct 2023
[Python / Selenium / BeautifulSoup](#)
Built a custom **web scraper** for www.BoardGameGeek.com and generated four CSV files containing board game information, structured to form a small relational database.
(<https://fotopoulos.eu.pythonanywhere.com/project1.html>)

Created apps

1) BoardGame-Guru Oct 2025
boardgame-guru.streamlit.app
Description: RAG-based web application enabling users to query board game rulebooks in natural language, using semantic search (embeddings + FAISS) and integrating a large language model via API. Built and deployed with Streamlit.
Technologies: Python, Streamlit, FAISS, SentenceTransformers, PyPDF, NumPy, REST APIs, LLM integration.

2) BoardGame-Scout Jan 2026
boardgame-scout.streamlit.app
Description: Data-driven web app integrating the BoardGameGeek API with an SQLite database for advanced search, filtering, and collection tracking. Features a collaborative-filtering recommendation system and automated GitHub Actions pipelines to maintain up-to-date data.
Technologies: Python, Streamlit, SQLite, Pandas, BoardGameGeek API, GitHub Actions, collaborative filtering.

3) PDF-Tool Sep 2025
pdf-tool-vf.streamlit.app
Description: Multi-functional PDF processing web application to compress, merge, split, rotate, and extract content from PDF files, as well as convert txt, py, and ipynb files to PDF format.
Technologies: Python, Streamlit, PyPDF2, Pillow, file processing automation.

Online courses - Certificates

>> Courses in the 365datascience platform

Present

The Machine Learning Process A-Z (2025)
Deep Learning with TensorFlow 2 (2025)
Machine Learning with Ridge and Lasso Regression (2024)
Machine Learning with Support Vector Machines (2024)
Machine Learning with K-Nearest Neighbors (2024)
Machine Learning with Naïve Bayes (2024)
Machine Learning in Python (2024)
Data Preprocessing with NumPy (2024)
Data Analysis with ChatGPT (2024)
How to Think Like a Data Scientist to Become One (2024)
Negotiation (2024)
Working with Text Files in Python (2024)
Data Cleaning and Preprocessing with pandas (2023)
Introduction to R Programming (2023)
Python Programmer Bootcamp (2023)
Introduction to Jupyter (2023)
Intermediate Python Programming (2023)
Introduction to Python (2023)
Advanced Microsoft Excel (2023)
Introduction to Excel (2023)
Intro to ChatGPT and Generative AI (2023)
Data Analysis with Excel Pivot Tables (2023)
Starting a Career in Data Science: Project Portfolio, Resume, and Interview Process (2023)
Communication and Presentation Skills for Analysts and Managers (2023)
Data Strategy (2023)
Data Literacy (2023)
Probability (2023)
SQL + Tableau (2023)
Mathematics (2023)
Introduction to Data and Data Science (2023)
Introduction to Tableau (2023)
